

## 1500°F / 815°C: DeltaGlass™ VC Very High Temperature & Heat Resistant Vermiculite Coated Fiberglass Cloth Fabric (Fireblanket)

Manufactured of texturized fiberglass yarns, this fabric has a 1500°F / 815°C continuous rating while providing high insulation value & excellent personnel protection. Coated with vermiculite for higher temperature performance and added abrasion resistance.

Good abrasion resistance and tensile strength.

Available with PSA (pressure sensitive adhesive\*).

1500°F / 815°C continuous rating, high insulation value & excellent personnel protection

A high-performance extreme-temperature fabric, used in almost all industries for the highest heat protection available

Roll length is 50 yards / 45 Metres. Please call for pricing on fabric with PSA

\*\*VCFCB cloth has a very high vermiculite content (10 to 12%). Allows for short term exposure to 2000°F and exceptional abrasion resistance.

\* Note: The PSA will burn off at temperatures above 400°F and should be used to facilitate installation. Material with PSA should not be used in confined areas at elevated temperatures without ventilation until all of the PSA has vaporized.

**This Product is Available By-The-Yard: Discounts for full roll purchases**
